

# OTM Carrier Connectivity Solution with Inspirage and SPS Commerce

*An integrated carrier connectivity solution for Oracle Transportation Management (OTM)*

## The Challenge

Virtually all OTM customers require electronic carrier connectivity with OTM. In the past, shippers have either built the connectivity in-house with their own tools or partnered with a 3<sup>rd</sup> party for carrier connectivity. In both cases, much of the connectivity to OTM was built as part of the project, resulting in lengthy projects when a large number of carriers and EDI messages were involved.

## The Solution

To expedite carrier connectivity and carrier on-boarding, Inspirage and SPS Commerce have jointly developed a set of pre-built interfaces between OTM and SPS Commerce's carrier connectivity solution.

### Pre-Mapped EDI Transactions

The following EDI transactions have been mapped and developed between OTM and SPS Commerce's carrier connectivity solution:

- Tender Offer/Pickup Notification (EDI 204)
- Tender Response (EDI 990)
- Shipment Status (EDI 214)

### Client-Specific Solutions

With Inspirage's world-class OTM consultants, we can build on the pre-built interfaces to ensure the solution meets each client's specific connectivity requirements.

### Single Point of Contact

Inspirage is now a reseller of SPS Commerce Carrier Connectivity solutions, so customers only need to engage one vendor for their implementation and connectivity needs.

## The Conclusion

OTM customers can now leverage existing carrier connectivity integration for carrier connectivity to reduce OTM implementation time and costs.

## Solution Benefits

- Pre-built interfaces between OTM and SPS Commerce's carrier connectivity solution
- Reduced implementation and carrier on-boarding costs
- Quicker time-to-value
- Single contract
