

# Comprehensive Warehouse Management System and Mobile Supply Chain Application Solutions

*Improving business processes on the warehouse floor*

## The Challenge

Many organizations today are tasked with meeting ever-growing customer service objectives while continuing to reduce costs. The key to top performance lies in solutions that improve business processes, driving efficiency and accuracy, while supporting enhanced data visibility.

---

## Our Solution

Inspirage delivers all of the components needed to drive your business processes on the warehouse floor. Inspirage provides consulting, deployment and implementation services using best-of-breed technologies from Oracle and our partners.

Comprehensive WMS and MSCA solutions from Inspirage simplify your project and reduce risks by having a single, experienced partner with complete accountability for the entire solution. You can trust that Inspirage will put years of Supply Chain expertise to work for you to deliver an effective, efficient solution.

## Solution Benefits

- Improved customer service
- Increased productivity
- Lower overhead
- Enhanced data visibility and accuracy

## Oracle Warehouse Management System (WMS)

Inspirage offers a **Comprehensive WMS Solution** to our customers. Unlike most enterprise application solutions that are software focused, warehouse management projects are unique, requiring three areas of expertise:

- Business process leading practices
- Oracle WMS software
- Supporting technologies such as material handling equipment, mobile data collection, enterprise labeling and wireless LAN

Inspirage offers deep expertise in all of these disciplines resulting in accurate, visible data, effective and efficient warehouse processes, and logistics operations that deliver Project ROI.

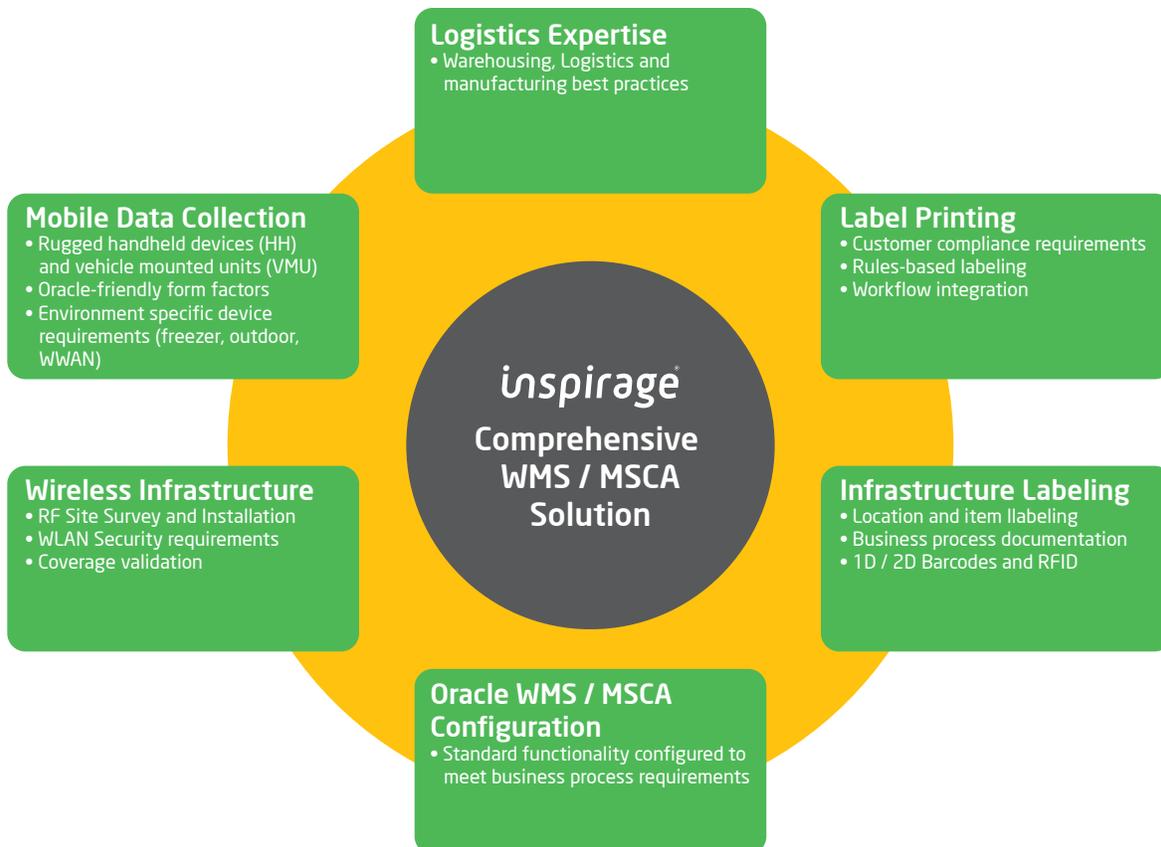

---

## Oracle Mobile Supply Chain Applications (MSCA)

Inspirage also offers a **Comprehensive MSCA Solution**. As a part of the Oracle E-Business Suite, Oracle MSCA enables mobile transactions and barcode data collection for many common warehouse and shop floor transactions. Our **Comprehensive MSCA Solution** delivers all of the necessary business process, application and technology components to enable barcode data collection as part of warehouse and manufacturing operations.

## Experienced Consultants

Using field-proven methodologies, Inspirage consultants achieve consistently successful results. Our consultants have a unique combination of industry knowledge, software and mobile technology experience, and project management skills to deliver consulting and implementation projects on time and on budget.

## Warehouse Optimization

As the business climate changes, warehouse operations often change as well. Recent trends with on-shoring, value-added services and location consolidation drive modifications to layout, staffing and business process within manufacturing and distribution. Evaluating and supporting those changes with industry leading practices and change management allows companies to successfully leverage those opportunities to improve the bottom line.

Inspirage's **Warehouse Optimization Solution** evaluates and documents the warehouse layout and existing business processes and delivers a report that offers feedback against industry leading practices, identifying specific opportunities for improvement that will drive value to the bottom line.

---

## Mobile Technology and Barcode Integration

Inspirage provides a full range of design and implementation services to enable your facility for wireless barcode data collection. Inspirage can design and integrate barcode (1D/2D) infrastructure and wireless infrastructure, as well as supply, implement, and support the hardware and software.

---

## Solution Partners

## Industry Certifications

Inspirage invests in Oracle and other industry certifications for its technology and consulting professionals to assure our customers that their implementation will be supported by experts who understand their entire solution.
