

Mecalac

MECALAC CASE STUDY INDUSTRIAL MANUFACTURING

Narinder Sokhi – IT Manager UK

March 14th 2018

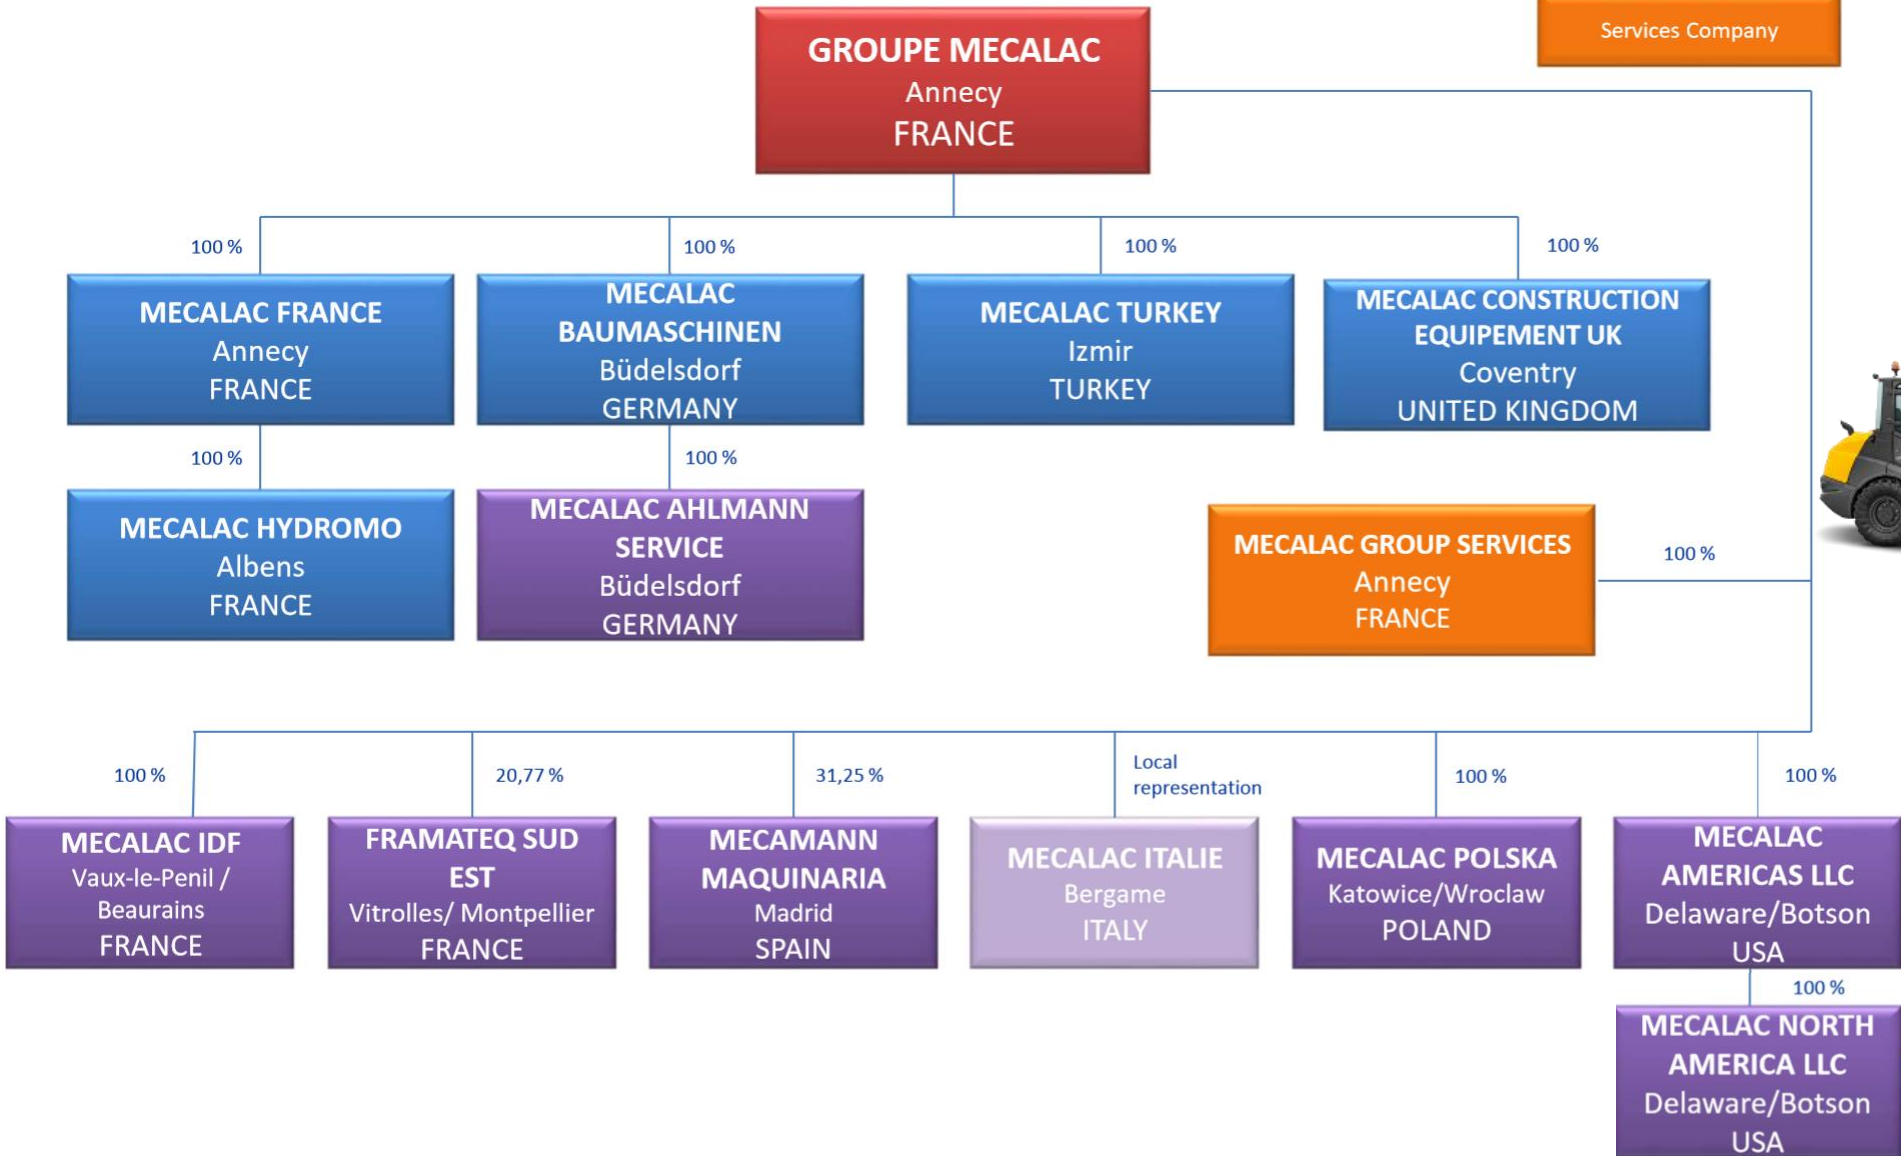

MECALAC INTRODUCTION & PROJECT OBJECTIVES

- Mecalac Group is headquartered in France with production sites in France, Germany, Turkey and assembly site in the US
- Specialized in excavators, loaders, scrappers, dumpers...
- 600 employees and 150 dealers
- Terex Coventry UK became Mecalac UK in December 2016. Adding 250 employees, new products, new dealers
- Usual separation of business support is required by Terex before March 2018 and drives the whole integration in an high priority mode
- The new Mecalac Group is now 850 employees, 5 factories and 200 dealers.
- The new Group must have common infrastructure and processes

Industrial Company
Sales Company
Services Company

ERP AND SCM CLOUD WORKING TOGETHER

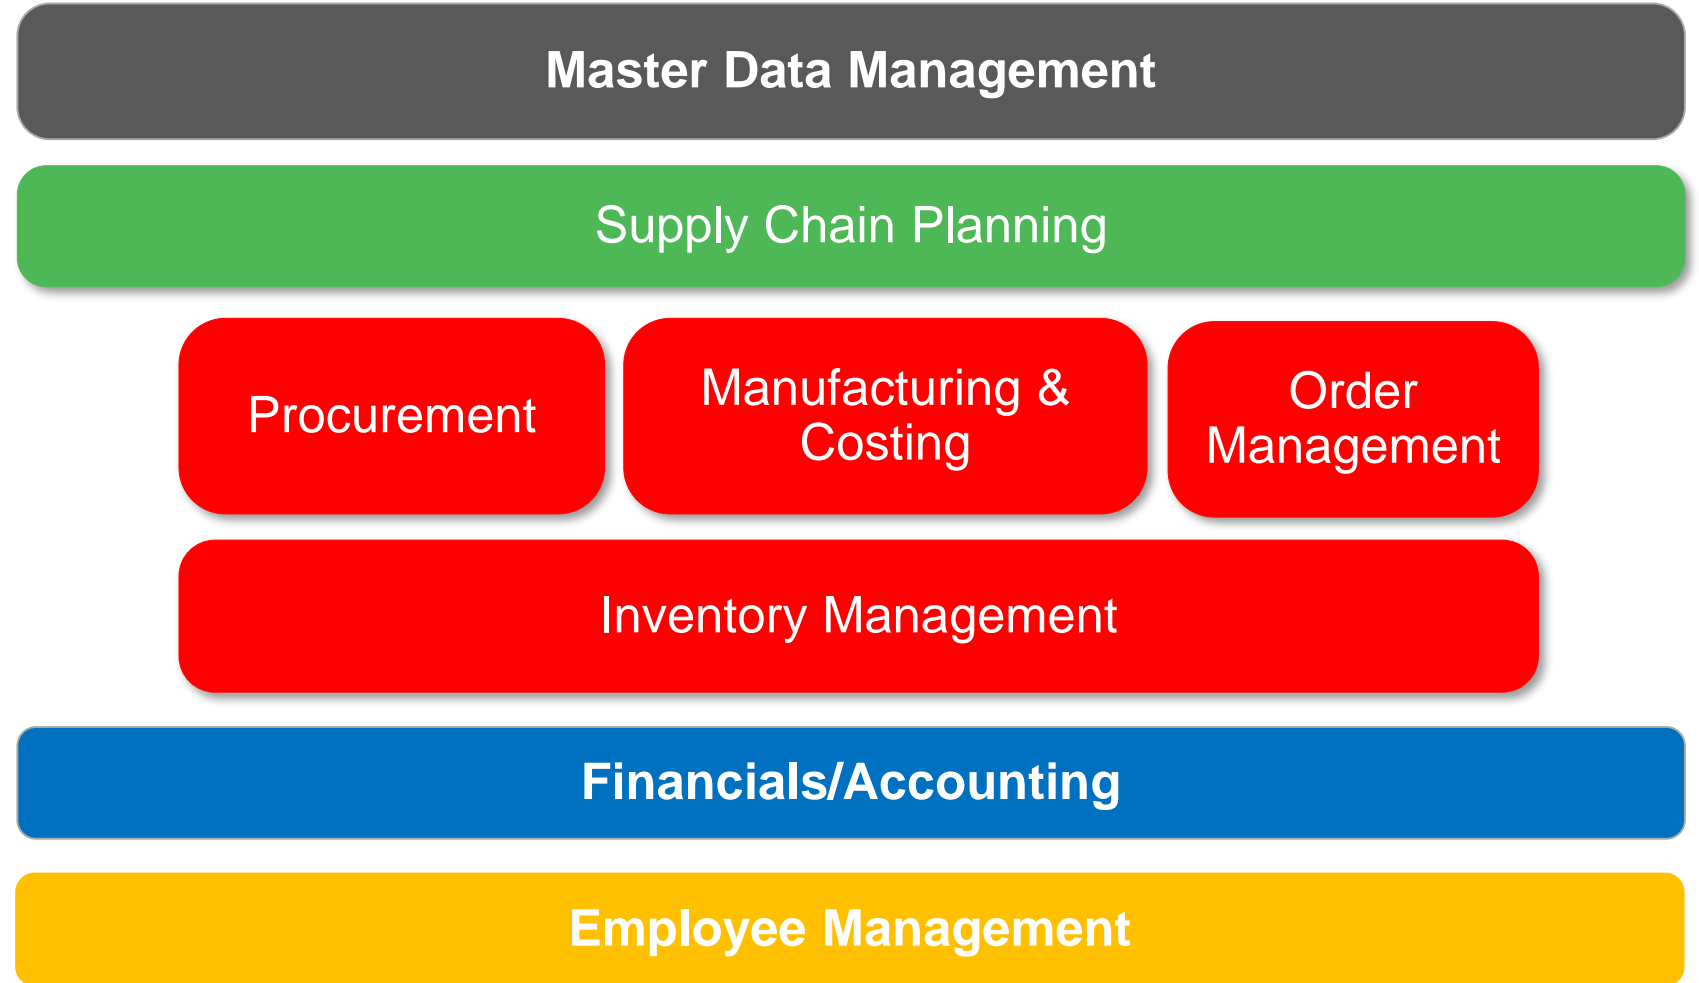

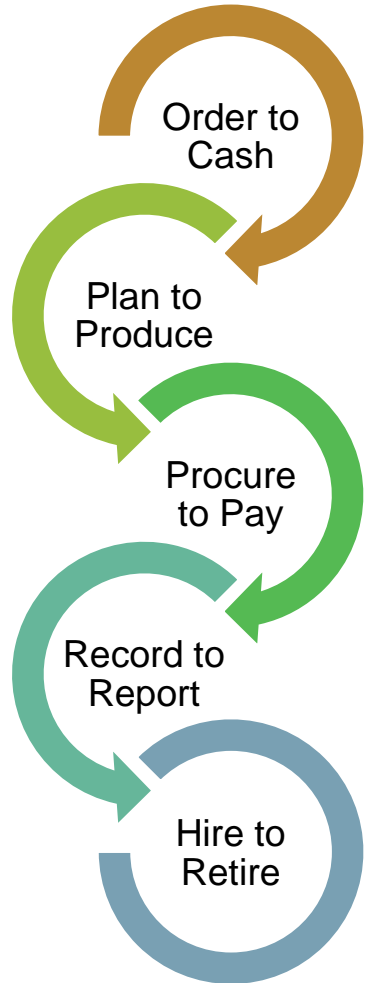

- **Project objectives**
 - Complete UK move to Cloud within 6 months
 - No customisation
 - UK to become the Gold standard for the Group
- Drive automation on the shopfloor
 - Remove paper KanBan cards
- Mecalac removed from Terex EBS instance March 2018
- Global deployment if UK successful

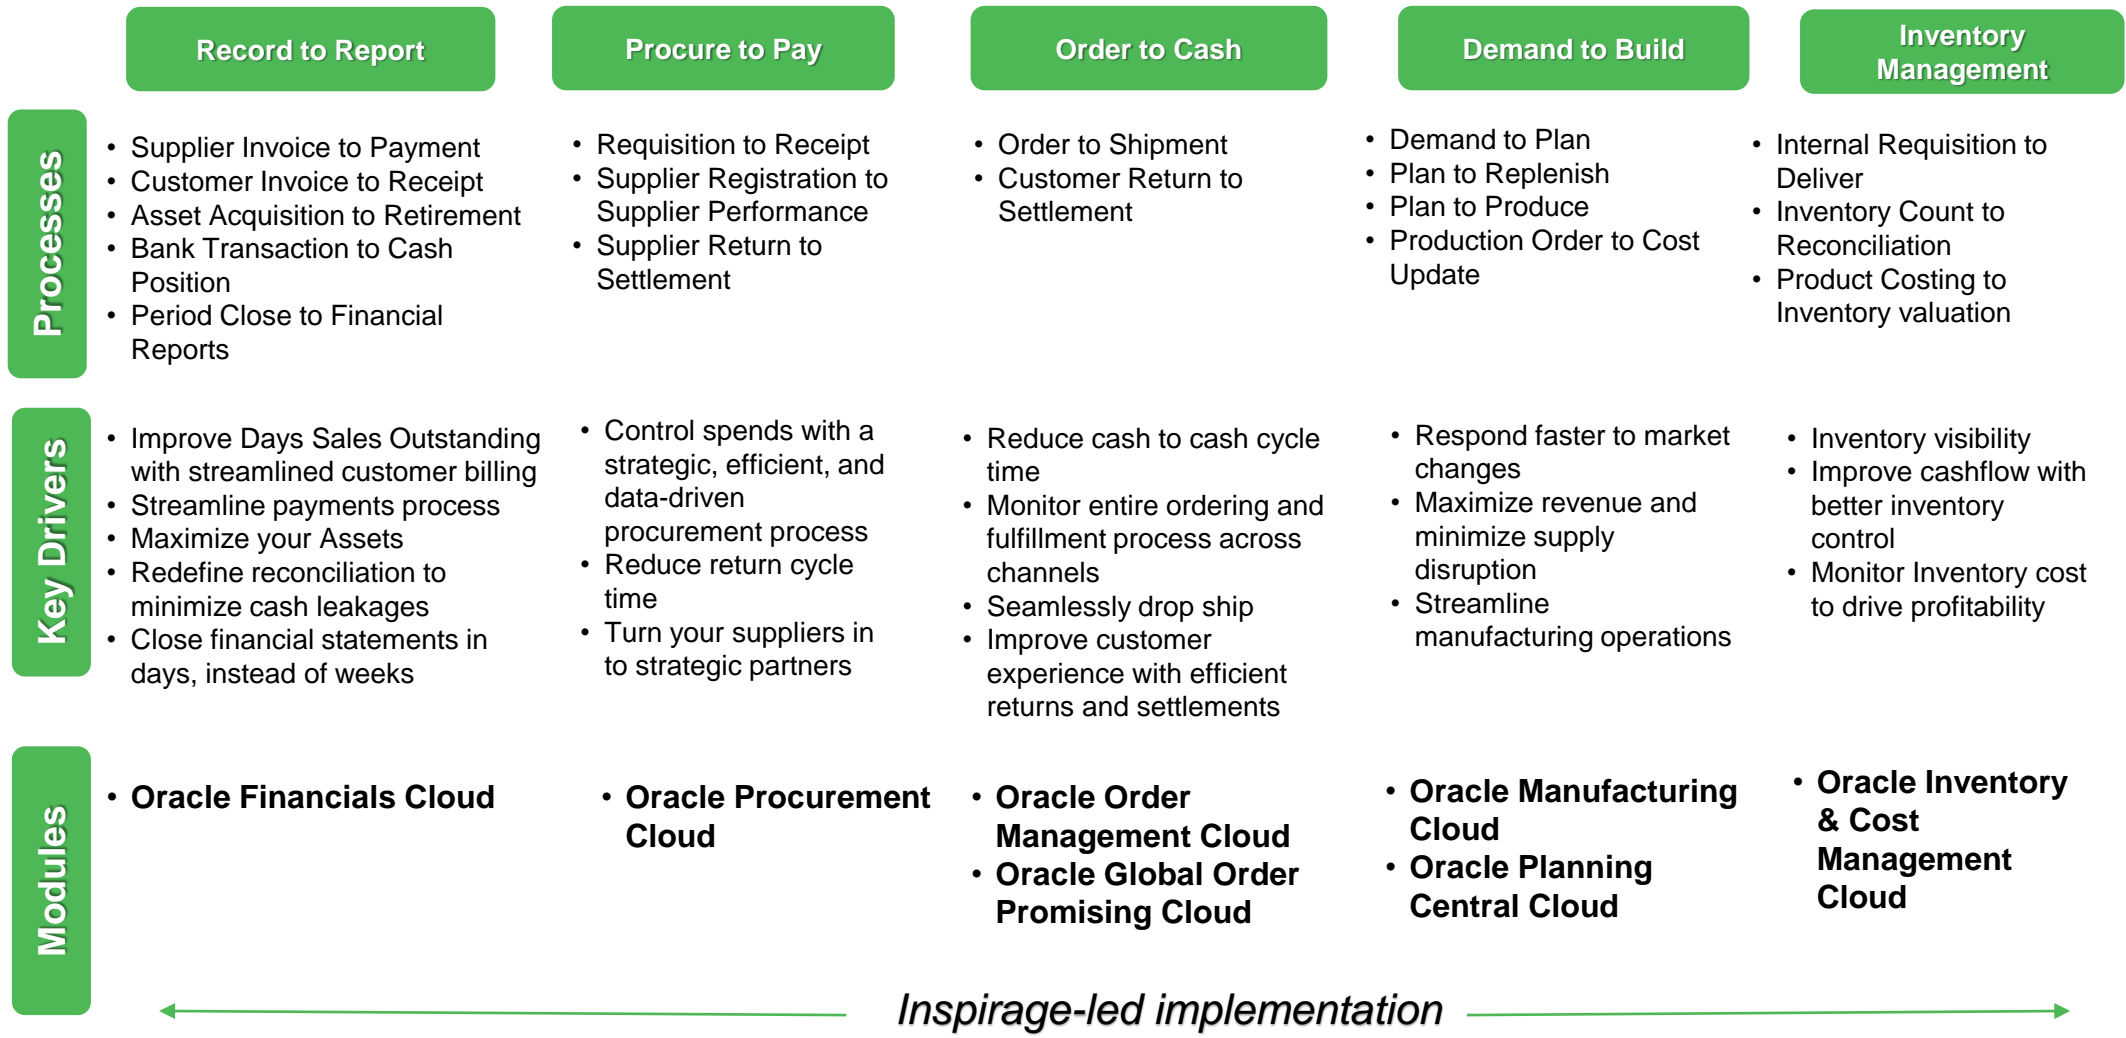

HOW WE APPROACHED THE PROJECT

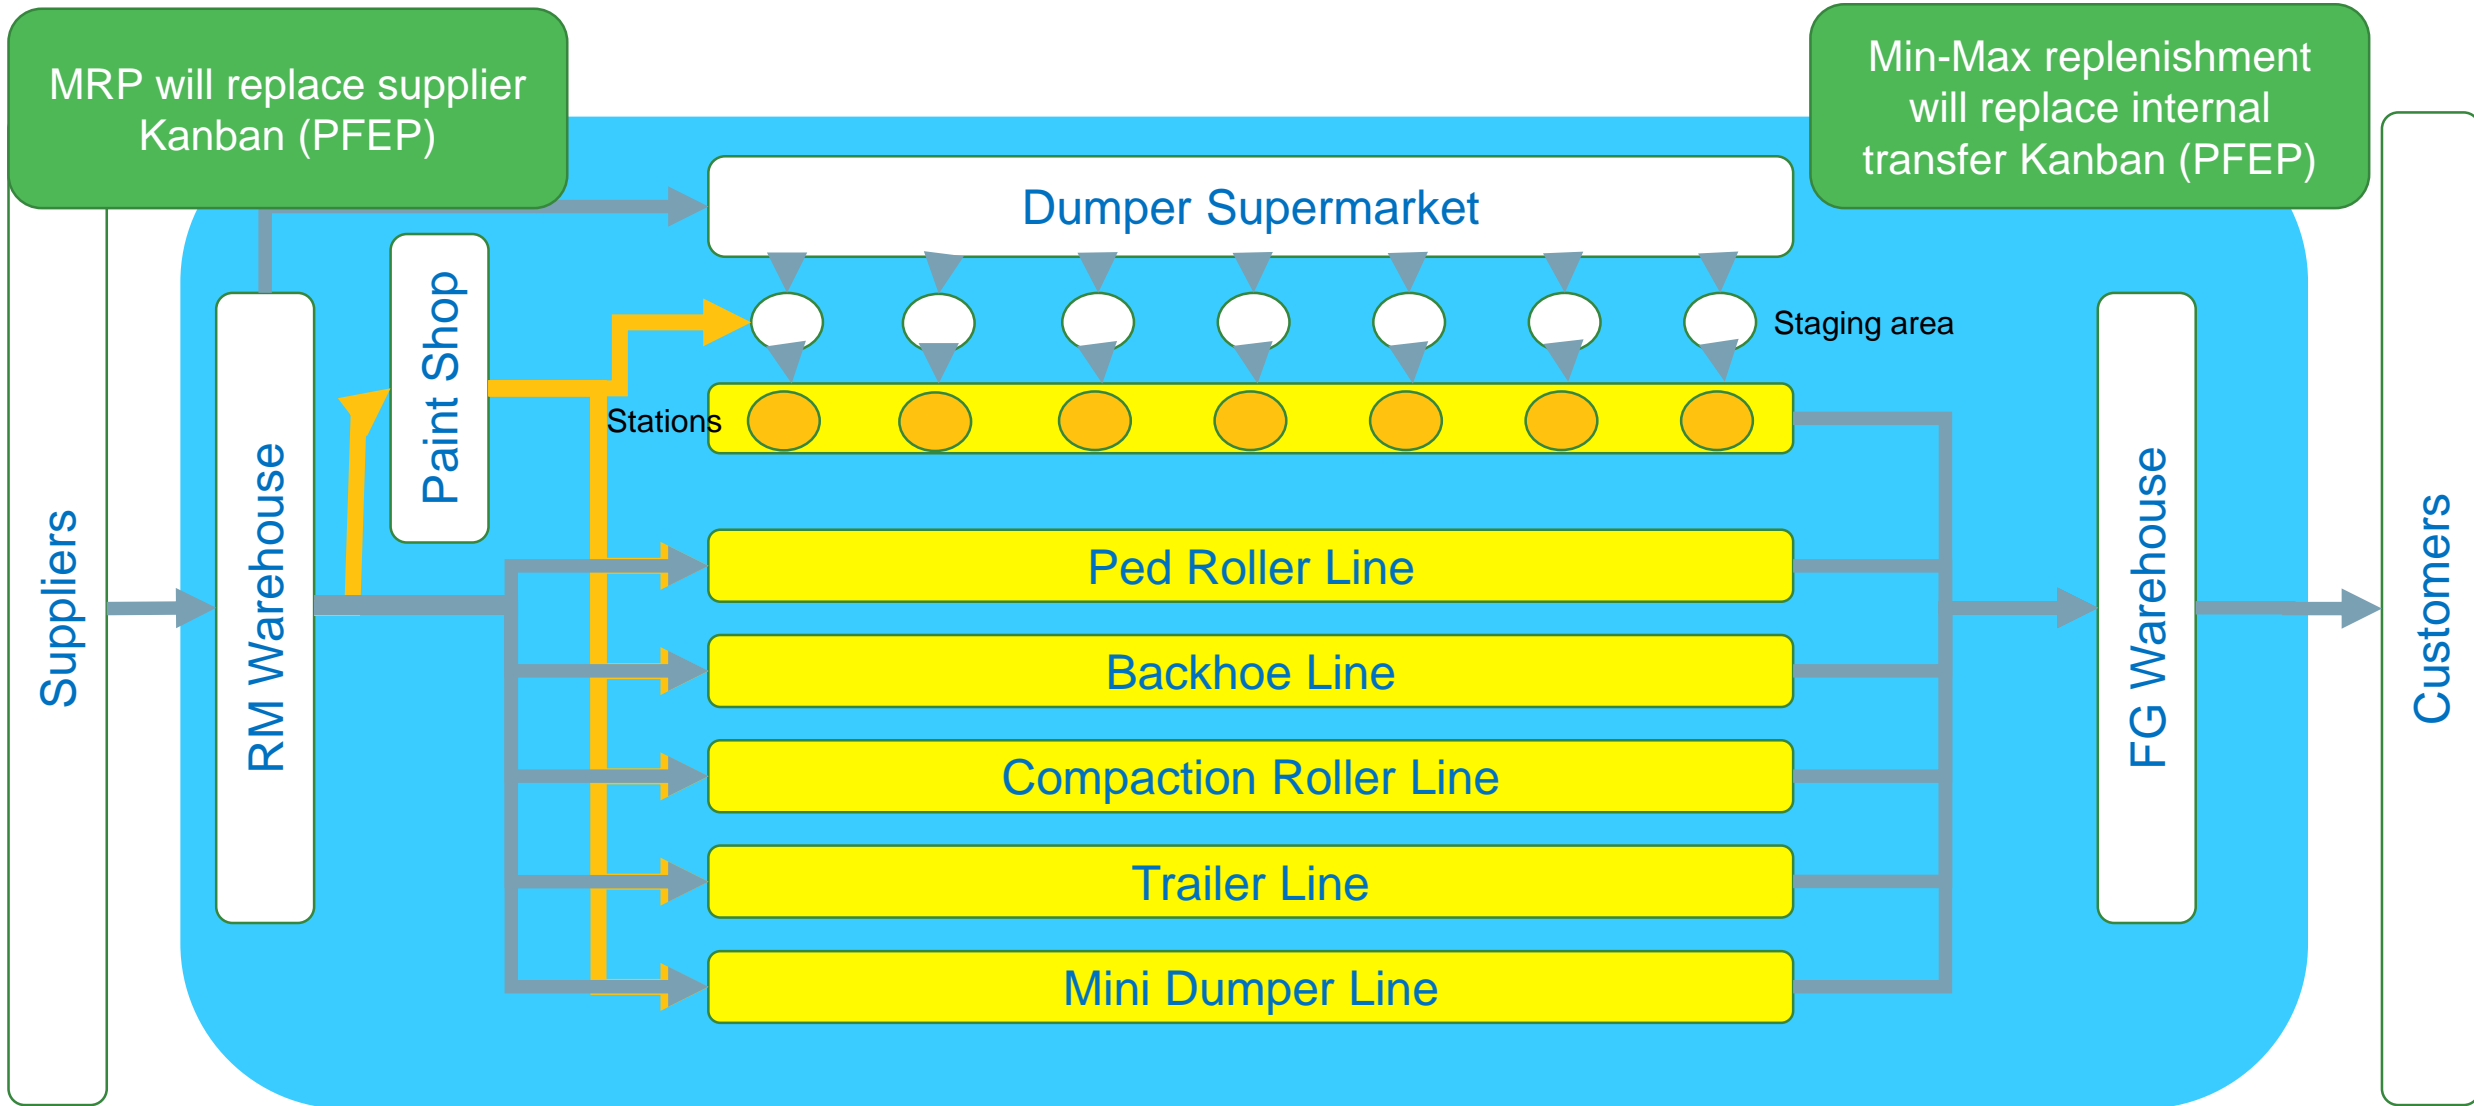

OVERALL SOLUTION

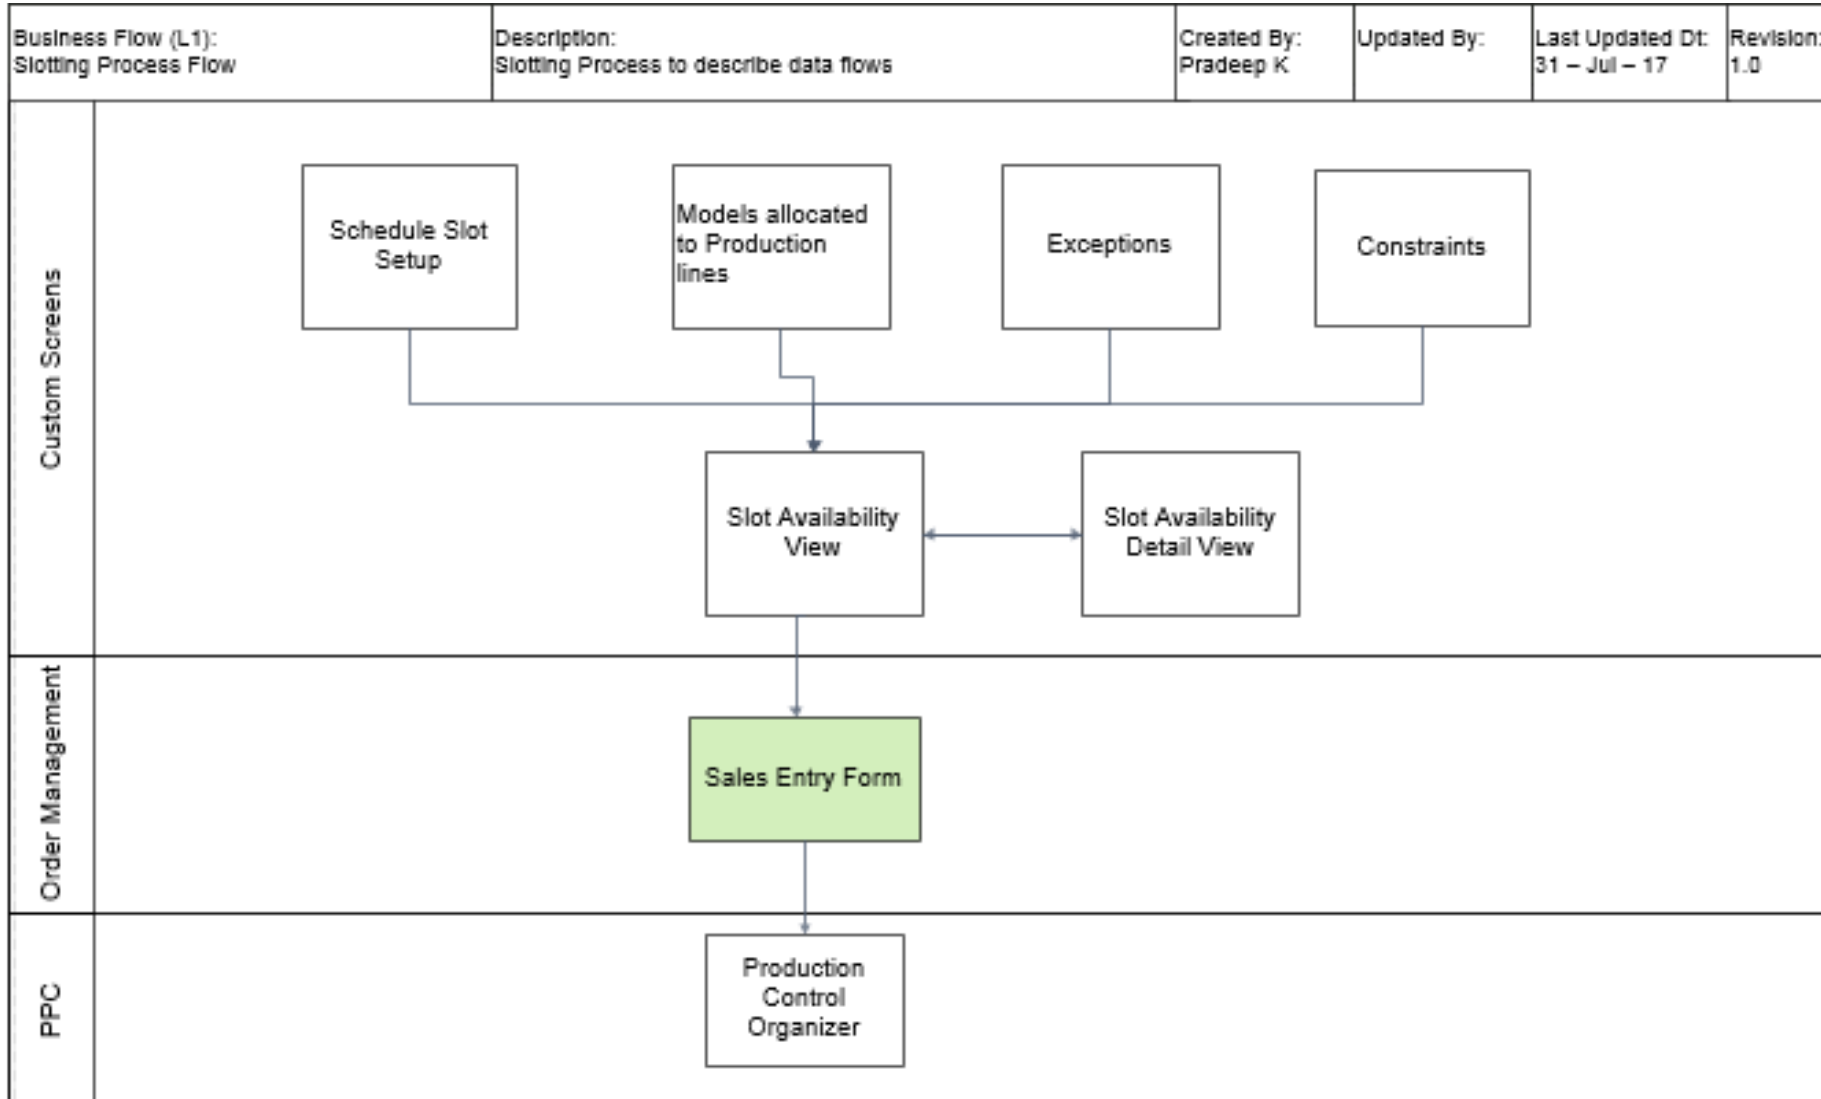

OVERALL SOLUTION

MATERIALS MANAGEMENT SOLUTION

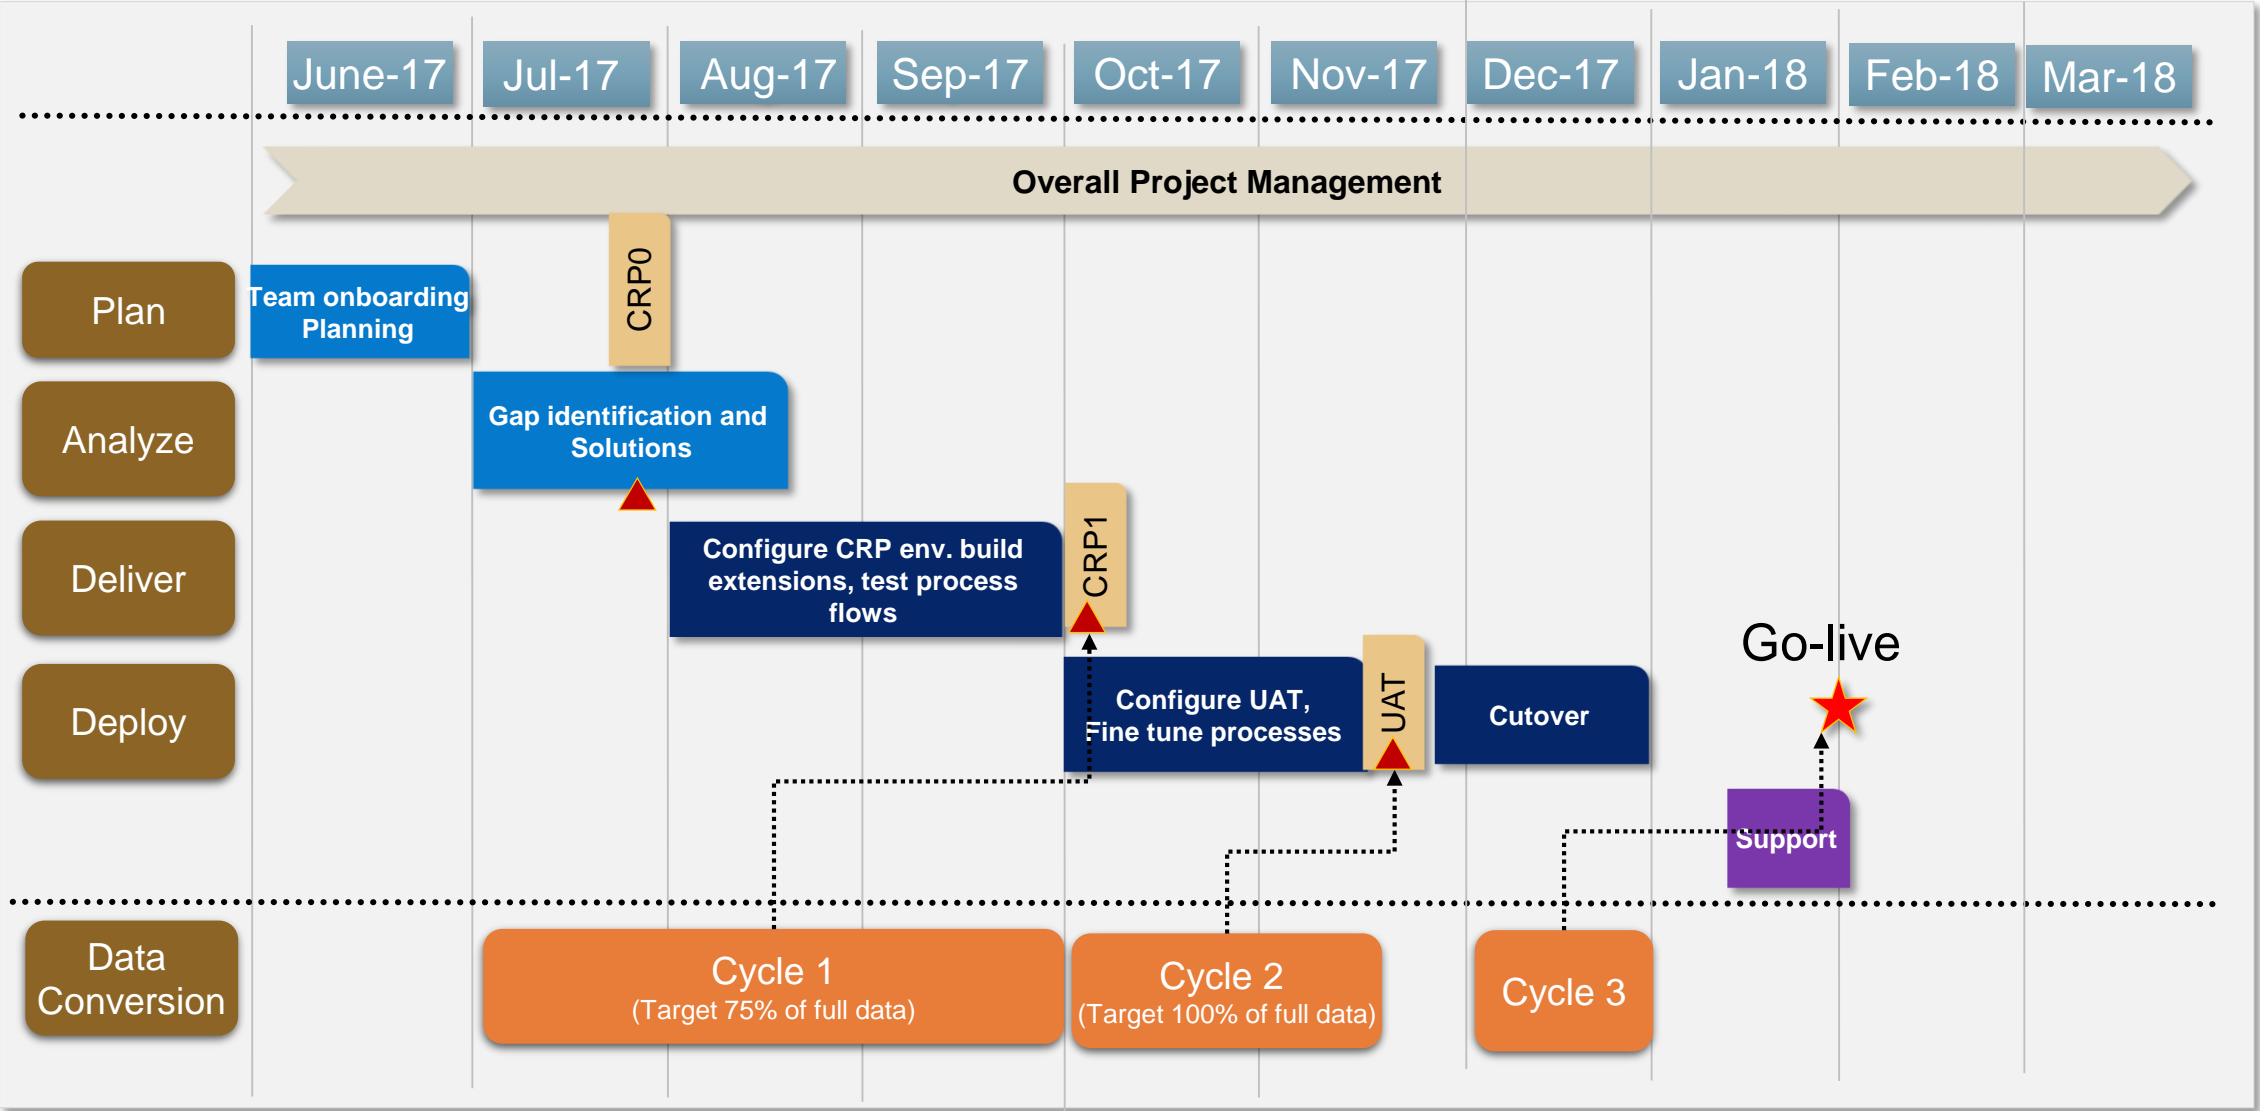

CLOUD EXTENSION - SLOTTING

HIGH LEVEL PROJECT PLAN

WHERE ARE WE TODAY ?

- **Go-live happening now!!**
 - Roughly five weeks delay
 - EBS disconnected by end March 2018
- Project is already considered as successful, so we are now moving to the Global Project
 - Common processes / Common solutions
 - Deploy in all countries
- Now preparing next steps, likely to be:
 - April 2018: US no legacy
 - May 2018: Turkey Infor
 - Nov 2018: Germany replacing legacy
 - 2019: France replacing Infor

CONCLUSION

PROCESS IMPROVEMENTS CLOUD VS EBS

- **User productivity** is enhanced in all areas – dashboards relevant to the user role, simple navigation, graphs, forward looking, preventative actions (as opposed to reactive)
- **Materials usage** in production will be closer aligned with the system for better material control
- **Supplier collaboration** is expected to streamline and improve collaboration with key suppliers. Sending orders, getting ASN, communicating changes
- **Warehouses** will be location controlled, replacing the need for separate system. Same item can reside in more than one location
- Better materials **planning and inventory** management tools
- Latest and updated **system capabilities** and interfaces regularly updated by Oracle
- **Continuity of business and reduced risk** with a global solution
