TOP 7

Cool New Features in Oracle R13 SCM Cloud

Inspirage has long been a proponent of the advantages of building a fully integrated supply chain. Now, with Release 13 of Supply Chain Management and ERP Cloud solutions, Oracle offers a fully integrated platform on which to build out that vision. Here are some of the top new features in R13 that we believe can help make that vision a reality.

1. Sales & Operations Planning*

Oracle Sales and Operations Planning Cloud provides a complete sales and operations planning (S&OP) solution for aligning organizations around an integrated operating plan to meet their strategic business goals.

2. Demand Planning*

Oracle Demand Management Cloud is a comprehensive supply chain planning application for accurately sensing, predicting, and shaping customer demand for a broad range of industries.

3. Supply Planning*

With Supply Planning, you can plan item, material and component supply; monitor supply performance; and respond to demand, availability and resource issues as they occur, thus enhancing operational efficiency and customer satisfaction.

4. Quality

Oracle's new Quality Management Cloud helps facilitate quality issues and controls throughout the entire end-to-end supply chain process.

Number 5
Maintenance

Oracle Maintenance Cloud provides a comprehensive ability to define and maintain assets across the enterprise using maintenance processes that are consistent and repeatable.

Number 6
Internet of Things

Companies can begin to digitize their supply chains with Oracle IoT solutions such as Fleet Management and Asset Management.

Number 7
Product Lifecycle Management

An improved user interface with deeper features to enhance user productivity for Innovation Management, Product Development, and Product Hub.

*Oracle Planning Central is required to deploy this module.

- ☑ Multi-fulfillment strategy planning
- ☑ Stakeholder collaboration through Oracle Social Network
- ☑ Integration with Oracle Supply Chain Collaboration Cloud
- ☑ Planning for Configure-to-Order Products
- ☑ External Data Source Collection

PLUS OTHER COOL FEATURES IN R13 PLANNING CENTRAL
